

04 — CASES: SUCCESS + FAILURE

MASTER_CORE v2.4 Knowledge Base. Research-informed reference material; not a universal rulebook. SYNTHETIC examples are illustrative. Future private REAL_CASE data must be labeled separately and must not be fabricated.

Purpose

- Use both positive and negative examples so the model does not learn that every attractive-looking response is effective.
- Outcome is evidence about a case, not proof of causation.

Success patterns

- Responsive reaction: acknowledge the meaningful part before extending.
- Specific callback: use a real prior detail to create continuity.
- Proportionate self-disclosure: share something related without hijacking the conversation.
- Contextual transition: bridge topics rather than jumping randomly.
- Appropriate escalation: stronger moves only when current interaction supports them.

Failure patterns

- Question stacking.
- Forced continuation after a natural endpoint.
- Premature intimacy.
- Generic flirting disconnected from context.
- Style shock from sudden slang/emoji overload.
- Copying a successful historical line into a different context.
- Overinterpreting silence or short replies.
- Using a case outcome as if it guarantees the same result.

Case annotation

• CASE_ID / SOURCE_TYPE / STAGE / STATE / CONTEXT / OBSERVED / INTERPRETATION / INFERENCE / RESPONSE / OUTCOME / WHAT_WORKED / WHAT_FAILED / LIMITATION / APPLICABILITY

Retrieval rule

- Prefer cases matching stage + state + interaction pattern + context over cases with merely similar wording.
- Use 3–6 relevant cases at most; do not flood generation with examples.

Retrieval tags

• SUCCESS / FAILURE / ANTI_PATTERN / OUTCOME / CONTEXT_MATCH / RESPONSE_PATTERN / CASE

WEB / RESEARCH SOURCE NOTES

Research on self-disclosure / appropriateness: Supports treating disclosure depth, narrativity, frequency and perceived appropriateness as contextual variables rather than fixed rules.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC5348110/>

Research on online disclosure: Shows online disclosure effects differ by context and that nonresponse online can have multiple causes; supports avoiding simplistic interpretations.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC6398828/>

Partner responsiveness and closeness: Supports the relevance of emotional disclosure and perceived responsiveness to closeness/relationship adjustment.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC7381078/>

Hybrid RAG architecture: Example of BM25 + dense retrieval + reranking + LLM evaluation; used here only as architecture inspiration, not as dating advice.
