

01 — RELATIONSHIP STAGES

MASTER_CORE v2.4 Knowledge Base. Research-informed reference material; not a universal rulebook. SYNTHETIC examples are illustrative. Future private REAL_CASE data must be labeled separately and must not be fabricated.

Purpose

- Use stage as contextual evidence, never as a certainty score.
- Stage should be inferred from repeated interaction evidence, not one isolated message.

Stage model

- S1 — STRANGER: little shared history; low assumed intimacy.
- S2 — EARLY ACQUAINTANCE: some familiarity, but limited relational evidence.
- S3 — REPEATED CONVERSATION: recurring interaction, shared references and growing familiarity.
- S4 — MET / OFFLINE INTERACTION: online and offline evidence coexist; meeting does not prove romantic intent.
- S5 — DATING: stronger relational context; still require current reciprocity.
- S6 — ESTABLISHED RELATIONSHIP: established shared history and expectations.

Stage evidence

- Useful signals: repeated reciprocity, voluntary sharing, callbacks, continuity, explicit plans, direct statements.
- Do NOT promote stage because of one fast reply, emoji, compliment, joke, or delayed response.

Generation implications

- S1–S2: favor low-pressure, context-specific responses.
- S3: callbacks, moderate personal sharing and playful interaction may fit when reciprocated.
- S4–S5: offline context becomes relevant; do not overread it.
- S6: shared history can support more shorthand and personalized responses.

Retrieval tags

- STAGE / RELATIONSHIP / FAMILIARITY / RECIPROCITY / INTIMACY / ESCALATION / APPROPRIATENESS

WEB / RESEARCH SOURCE NOTES

Research on self-disclosure / appropriateness: Supports treating disclosure depth, narrativity, frequency and perceived appropriateness as contextual variables rather than fixed rules.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC5348110/>

Research on online disclosure: Shows online disclosure effects differ by context and that nonresponse online can have multiple causes; supports avoiding simplistic interpretations.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC6398828/>

Partner responsiveness and closeness: Supports the relevance of emotional disclosure and perceived responsiveness to closeness/relationship adjustment.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC7381078/>

Hybrid RAG architecture: Example of BM25 + dense retrieval + reranking + LLM evaluation; used here only as architecture inspiration, not as dating advice.
