

10 — MEETING TRANSITION

MASTER_CORE v2.4 Knowledge Base. Research-informed reference material; not a universal rulebook. SYNTHETIC examples are illustrative. Future private REAL_CASE data must be labeled separately and must not be fabricated.

Purpose

- Moving from chat toward meeting is an escalation decision, not a fixed timing formula.

Readiness evidence

- Repeated reciprocal conversation.
- Shared interests or concrete activities.
- Comfortable callbacks and personal interaction.
- Explicit availability or discussion of places/activities.
- Positive response to smaller relevant plans.
- Direct willingness to meet.

Escalation ladder

- 1. Discuss a shared activity/context.
- 2. Connect that context to a possible offline plan.
- 3. Suggest a low-pressure concrete option.
- 4. Accept ambiguity or refusal without pressure.
- 5. Coordinate details only after reciprocal interest.

Do not

- Do not treat one compliment as meeting readiness.
- Do not make every conversation a date pitch.
- Do not pressure after a clear no.
- Do not infer romantic intent from meeting acceptance alone.
