

09 — REOPENING CONVERSATIONS

MASTER_CORE v2.4 Knowledge Base. Research-informed reference material; not a universal rulebook. SYNTHETIC examples are illustrative. Future private REAL_CASE data must be labeled separately and must not be fabricated.

Core rule

- After silence, recalculate the current episode instead of assuming the previous state continues.

Reopening types

- REOPEN_SAME_THREAD — new message directly continues the old topic.
- REOPEN_CALLBACK — old detail is deliberately revived.
- NEW_EPISODE — enough context/time has passed for a new interaction.
- UNCERTAIN — evidence is insufficient.

Inputs

- TIME_GAP / LAST_STATE / CLOSURE_SIGNAL / PREVIOUS_TOPIC / NEW_CONTEXT / CURRENT_MESSAGE

Good reopening

- Use a genuine prior reference when appropriate.
- Keep intensity proportional to the gap.
- Do not demand an explanation for silence unless context makes it appropriate.
- Do not interpret silence as proof of rejection or attraction.

Retrieval tags

- REOPEN / SILENCE / TIME_GAP / CALLBACK / NEW_EPISODE / PAUSE

WEB / RESEARCH SOURCE NOTES

Research on self-disclosure / appropriateness: Supports treating disclosure depth, narrativity, frequency and perceived appropriateness as contextual variables rather than fixed rules.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC5348110/>

Research on online disclosure: Shows online disclosure effects differ by context and that nonresponse online can have multiple causes; supports avoiding simplistic interpretations.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC6398828/>

Partner responsiveness and closeness: Supports the relevance of emotional disclosure and perceived responsiveness to closeness/relationship adjustment.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC7381078/>

Hybrid RAG architecture: Example of BM25 + dense retrieval + reranking + LLM evaluation; used here only as architecture inspiration, not as dating advice.
