

03 — GENZ REAL CONVERSATIONS / STYLE REFERENCE

MASTER_CORE v2.4 Knowledge Base. Research-informed reference material; not a universal rulebook. SYNTHETIC examples are illustrative. Future private REAL_CASE data must be labeled separately and must not be fabricated.

Important status

- This starter file does NOT claim to contain the user's private 23 real conversations.
- Public/web-derived observations and SYNTHETIC examples are clearly separated from future REAL_CASE material.

Language principles

- Match the actual person before matching internet slang.
- Short messages, fragments, laughter markers and emoji can be normal, but their meaning is person-specific.
- Do not insert slang simply because the speaker is young.
- Do not manufacture typos or slang to appear Gen-Z.
- Do not treat emoji count or reply speed as an interest score.

Response diversity

- Naturalness can come from different conversational moves: react-only, react+share, react+callback, react+playful extension, react+light question, or clean close.
- Multiple candidates should differ in social function or conversational move, not merely punctuation.

Screenshot / role safety

- Speaker identity must be established before using any case.
- If OCR or visual role is uncertain, preserve UNKNOWN rather than guessing.
- Future REAL_CASE entries should preserve exact original messages separately from interpretation.

Retrieval tags

- GENZ / LANGUAGE / RHYTHM / SLANG / EMOJI / STYLE / NATURALNESS / REAL_CASE / SYNTHETIC

WEB / RESEARCH SOURCE NOTES

Research on self-disclosure / appropriateness: Supports treating disclosure depth, narrativity, frequency and perceived appropriateness as contextual variables rather than fixed rules.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC5348110/>

Research on online disclosure: Shows online disclosure effects differ by context and that nonresponse online can have multiple causes; supports avoiding simplistic interpretations.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC6398828/>

Partner responsiveness and closeness: Supports the relevance of emotional disclosure and perceived responsiveness to closeness/relationship adjustment.

<https://pmc.ncbi.nlm.nih.gov/articles/PMC7381078/>

Hybrid RAG architecture: Example of BM25 + dense retrieval + reranking + LLM evaluation; used here only as architecture inspiration, not as dating advice.
